Palfinger, AG   January 27, 2020
Lamprechtshausener Bundesstraße 8
5101 Bergheim bei Salzburg
Austria

Dear Hiring Manage,

I am currently studying Computer Science at Appalachian State University, NC, USA as an exchange student. After this semester, in May 2020, I plan to finish studying at the Johannes-Kepler-Universität, Austria. I would like to apply for an internship opportunity to work with the IT department of Palfinger in Bergheim and Köstendorf. I believe that this internship opportunity will help me build on and advance my skills in the areas of Software Engineering and server administration and hardware."

As I could see in your job posting on your website, the IT department of Palfinger in Bergheim and Köstendorf is especially active in software engineering. This area in particular would interest me. My goal for an internship would be the acquisition of new knowledge and the application of what I have learned.

I would love to work at Palfinger as an intern. I am very flexible when it comes to the time and length of the internship. I am available from Monday, June 6th to Friday, September 18th. I am interested in an internship that is as long as possible to achieve a better learning effect.

Thank you for your consideration, and I look forward to hearing from you.

Yours faithfully,

Eric Schinwald
